

YILDIRIM ENERGY HOLDING

ENVIRONMENTAL POLICY

The Environmental Policy that we adopt as Yıldırım Energy Holding and all our companies within its borders stems from the great respect for people and the environment they live in. One of our most important goals is to protect all of our employees and the environment we live in against possible risks in our line of business in all areas where Yıldırım Energy works. In this direction;

 *For Supporting sustainable life; Establishing facilities and systems with high energy efficiency, sensitive to the environment and carbon emission reduction, by giving priority to possible environmental impacts in the project development, design, facility establishment and operation processes in the light of advanced technologies and engineering practices at home and abroad,*

 *In line with the life cycle approach; Acting consciously to prevent pollution and protecting the environment by reducing resource consumption, analyzing environmental impacts by taking into account the changing environmental conditions, taking necessary measures to avoid environmental pollution,*

 *Implementing the Environmental Management System effectively and carrying out trainings and activities for continuous improvement and increasing the environmental awareness and sensitivity of our employees in order to ensure its continuity,*

 *Identifying all kinds of risks related to the environment that may occur in our processes, to eliminate them or to reduce them to an acceptable level,*

 *Complying with environmental legal and other requirements,*

 *Measuring, analyzing and improving the performance of the Environmental Management system,*

 *By implementing an effective waste management program, preventing waste generation in our businesses and investment projects during the "design, implementation and operation" periods, reducing the amount of waste generated, minimizing the harm to the environment and people, reusing products that may be waste whenever possible, evaluating recycling opportunities and recycling them. In the event that wastes that cannot be recycled occur, we are committed to eliminating or ensuring that they are disposed of without harming the environment.*

 *As our environmental policy; we are determined to ensure the continuity of our Environmental Management System, which has been established and implemented in this direction.*
